

OJAI · BALDWIN ROAD · 44 ACRES · AGRICULTURE INVITED

Forty-Four Acres, Waiting to Become a Farm.

A land study and development vision for Howard — what the property truly is today, and everything it could grow into.

PREPARED FOR HOWARD · BY PAUL MURESAN · AUGUST 2026

THE LAND TODAY

~44.1 acres of raw potential with a working spine.

1320 Baldwin Rd, Ojai · APN 032-0-010-090 · County unincorporated · ~44.1 acres per County GIS · **OS-40 zoning** (Open Space, 40-acre minimum) with Scenic Resource Protection, Dark Sky, Habitat Connectivity & Wildlife Corridor and Temporary Rental Unit overlays. Standing today: the main residence, a studio, first hugelkultur beds and livestock. The rest is open land — raw, quiet, and full of room.

WHAT THE LAND OFFERS

Scale that means freedom: forty-four acres under Open Space zoning, in a valley where regenerative projects thrive and neighbors notice land done well.

A working spine already in place — the residence, a studio ready to become a real workshop, first hugelkultur beds and animals on the ground. The land has begun; it is asking to continue.

Protected beauty: scenic-resource and dark-sky overlays keep this corner of Baldwin Road the kind of quiet that is disappearing from the valley.

WHAT IT COULD CARRY

A full **regenerative agriculture homestead**: growing systems that feed people and build soil — hugelkultur, nursery, mushrooms, bees, rotational livestock, compost, a growing dome.

A **living-and-community layer** that grows only as wanted: the restored pond, the workshop, a small welcome cabin, quiet sacred spaces among the oaks.

All thirteen projects live as icons on the interactive map — every one placed as a suggestion, every one a conversation.

“Raw land is potential in its purest form — and this land has already taken its first breath.”

SEE IT LIVE

The interactive map at howard-property-dev.vercel.app shows this property two ways: **Today** — exactly as it is · **Vision** — everything below, placed on the real land · and in full 3D.

The Development Picture

The Howard Property · 1320 Baldwin Rd, Ojai

GROWING SYSTEMS

- **Hugelkultur beds** — buried-wood beds that hold water through the dry season; the first are already in the ground.
- **Property nursery** — natives and food trees; plants for this land first, sales later.
- **Mushroom cultivation** — container-based gourmet production; fast yield, small footprint.
- **Beekeeping** — pollination for everything else, honey besides.
- **Livestock rotation** — fertility on legs, fire-fuel reduction.
- **Compost operation** — the engine that turns waste into the soil bank.
- **Growing dome** — year-round protected growing.

LIVING & COMMUNITY

- **Pond & swimming hole** restored — irrigation storage plus summer life.
- **Community workshop** — the studio grown into a real makerspace.
- **Welcome cabin** — a small cob-style dwelling; the land's front door and Paul's proposed home base.
- **Nature gym & sacred spaces** — simple, quiet, among the oaks.
- **The main house** — **untouched**. Howard's home remains the heart of the property.

THE PHASED PATH

- **Phase 1 · months 0–6 — arrive & prove:** studio settled, first beds built, compost running, nursery started. Small, visible, real.
- **Phase 2 · months 6–18 — grow:** mushrooms, bees, livestock rotation, the pond restored, the workshop humming.
- **Phase 3 · beyond — flourish:** the full thirteen-project homestead that feeds, teaches, and makes the land more alive every season.

STEWARDSHIP PRINCIPLES

- **Your land, your call.** Nothing irreversible without an explicit yes.
- **Phase by phase.** Each phase small enough to stop, good enough to keep.
- **Documented like software.** Mapped, photographed, written up — the living map stays your window into your own land.
- **Agriculture first.** Soil, water and food lead; community pieces grow only around a working agricultural core.

WHO WOULD BRING IT TO LIFE

Paul Muresan — visionary, designer and creator; landscape & regenerative lead of the Sulphur Mountain Eco-Village and creator of the valley's living property map. He designs the vision and orchestrates the teams that make it real. His own brochure accompanies this one.

“Everything here is a conversation starter — nothing is final until we shape it together on the land.”

Walk the land, then decide together.

Bring the map on a phone, stand on the spots, move any icon where it belongs. From there, Phase 1 shapes itself.
