

OJAI VALLEY · VISIONARY · DESIGNER · CREATOR · TRAILBLAZER

Land, Code & Vision — a Visionary Looking for His Next Ground.

Vision, design and team orchestration — full land development led end to end, offered in exchange for a home base on the right property.

AVAILABLE NOW · OJAI VALLEY · READY TO WALK YOUR LAND

THE OFFER

I lead your land's development — you keep the land, the harvest, and the story.

I design the vision, assemble the right hands, and navigate the teams that make it real — agriculture, water, structures, living systems. Alongside it, the layer almost nobody else brings: **a living interactive map of your property**, proposals, budgets and documentation of everything that happens. **Real leadership, real schedules, real accountability.**

WHO I AM

I am a visionary, a designer, a creator — an action taker and a trailblazer. I see what land can become, design the path, and bring together the people who make it real. I develop properties and technology as one craft.

I orchestrate teams and workflows toward a shared mission, while the digital layer I create myself — living maps, 3D worlds, platforms — keeps every project visible. Most recently: landscape & regenerative lead of an Ojai eco-village.

WHAT I'M LOOKING FOR

A **home base on land with potential** — a place to live simply (a studio, cabin or small dwelling to start) in exchange for leading the property's development, phase by phase, with the owner's blessing at every step.

The right land has more potential than its owner has time for — and an owner who wants to see it come alive without carrying the work alone. Ojai Valley first; long enough to matter. I put down roots, I don't pass through.

“I don't develop properties from a distance — I live on them, design their becoming, and give them a digital soul.”

THE KIND OF PARTNER I AM

Everything in writing, everything visible. Projects begin as conversations, get agreed on paper, then get built — documented with photos, budgets and a living map the owner can open any day. Nothing irreversible without an explicit yes; phases small enough to stop, good enough to keep.

WHY NOW

I am transitioning from my current base on Sulphur Mountain and choosing the next chapter deliberately. I am not looking for a room — I am looking for the land where the next years of my energy belong. **Available now; ready to walk a property this week.**

PROJECTS & PLATFORMS

Sulphur Mountain Eco-Village · The Ojai Valley Living Map (2D/3D) · Lemuria Life · Black Mountain Ranch Vision · Rose Valley Basecamp Study

The Practical Side

Paul Muresan · Land, Code & Vision

HOW I DEVELOP LAND

- **Vision & master design:** the whole property thought as one living system — agriculture, water, structures, gathering places.
- **Teams, not solo hands:** I assemble the right specialists, crews and collaborators for each project, and navigate them through the work.
- **Workflow & accountability:** plans, schedules and budgets that keep every hand moving toward the same mission.
- **Regenerative systems:** hugelkultur, nurseries, mushrooms, bees, rotational livestock, compost — designed into one interlocking whole.

WHAT I BUILD IN CODE

- **Living property maps:** interactive 2D/3D maps with real county parcel data, project layers and photo galleries — see Recent Work.
- **Proposals & investor documents** that make land visions concrete: budgets, phases, one-pagers, full decks.
- **Platforms & automation** for managing projects, communities and property operations.
- **Tomorrow:** AR/VR-ready digital twins of real properties — the direction my whole stack is pointed.

WHAT I'M PROPOSING

- **A home base** — studio, cabin or small dwelling on your land, starting simple and growing only with your blessing.
- **Leadership as the trade:** vision, design, orchestration and digital platforms against the arrangement — and every project carries its own plan, budget and crew, funded as we agree before it begins.
- **Phased agreements in writing** — settled together on a walkthrough, once we both see what the land actually needs.
- **A term long enough to be worth both our while.**

HOW THIS COULD LOOK

- **Raw land with a vision** — the first phase proves value in months, not years, and we grow from there.
- **An operating property** that needs a steward-partner to carry projects the owner cannot.
- **An acquisition project** that needs a development partner with vision, teams and platforms.

RECENT WORK

The Ojai Valley Living Map — six real properties, county-true parcel lines, a Today / Vision toggle, and a 3D globe you can fly — designed and built solo, live at howard-property-dev.vercel.app.

Sulphur Mountain Eco-Village — landscape & regenerative lead: 18-project vision, operations and land care on ~93 acres.

“If you have land with more potential than you have time for — that is exactly where I belong.”

Let's talk, then walk your land.

The right arrangement is settled in person. A conversation first, then a walkthrough — and we will both know quickly whether it fits.
